

# NETWORK SECURITY MANAGEMENT SERVICES

Your business needs proactive protection and real-time response.

## Why Choose TeleGlobal?

### Remote Expertise

Specialized team for distributed environments

### Compliance Ready

Support for ISO 27001, HIPAA, GDPR & more

### Proactive Threat Hunting

Not just reactive; we anticipate risks

### Scalable Security Architecture

Designed for businesses of all sizes

## Why Network Security Management Matters

60% of SMBs that face a cyberattack go out of business within 6 months

Cyberattacks occur every 39 seconds

Remote teams increase vulnerability — security must evolve

Your business needs proactive protection and real-time response.

### 24/7 Monitoring & Threat Detection

Continuous surveillance of network traffic to catch and contain threats instantly

### Patch & Vulnerability Management

Keep systems up-to-date to block known exploits and vulnerabilities

### Security Policy Enforcement

Enforce consistent security policies across remote endpoints and networks

What  
TeleGlobal  
Delivers

### Firewall & Intrusion Prevention Management

Advanced perimeter defense with updated firewall rules and IPS/IDS systems

### SIEM Integration

Real-time log analysis and incident alerts across all systems

### Data Encryption & Access Control

Protect sensitive data and limit access based on user roles

Protect Your Business Before It's Too Late!
